## 1st International NANO-LASER SYMPOSIUM + LIVE SURGERY

Find out, what CETUS® Nano-Laser  
can do for you and your patients.

Saturday April 28, 2018

9:00 - 16:30

MARITIM, Stuttgart, Germany

[www.charlottenklinik.de](http://www.charlottenklinik.de)

## INTRODUCTION

Dear colleagues,  
The first Live-Surgery Symposium on Nano-Laser cataract surgery will offer presentations from different surgeons around the world. We will demonstrate in life surgery, how the Nano-Laser works, its advantages and also discuss further improvements.

Lectures are given by routine users, including demonstrations of different laser technics.

With more than 3 years of experience using the Nano-Laser, we would like to share this knowledge with our participants during the symposium.

Our special focus will be a live surgery, explanation of tips and tricks as well as pointing at pitfalls - and of course learning from complications.

We welcome you in Stuttgart and are looking forward to seeing you on April 28<sup>th</sup>.

Prof. Dr. med. Gangolf Sauder
